

Weipa Accommodation Upgrades

Location
Weipa, Queensland

Client
Comalco

Project Value
\$5 Million

Start Date
2003

Office Responsible
Cairns

Responsibilities
Expert purchasing, project management, civil & structural design and site superintendency

Project Scope

Black & More managed the 'fast tracked delivery' of upgrades to 130 accommodation units, messing facilities and civil works at Comalco's Weipa Mine Site.

The fast tracking of the accommodation construction allowed the earliest possible start to the \$2 B NeWeipa mine development which has seen a significant increase in the mining and processing of bauxite from the Weipa minesite and subsequent alumina and aluminium production from Comalco's Gladstone refinery.

Black & More co-ordinated the consultant team on the project which included an architect and mechanical, electrical and specialist engineers. We managed the fast tracked tendering process and the logistics involved in delivering multiple construction contracts in a 6 month construction period.

The project was completed ahead of time and on budget.
